- Large button for easy activation with racing, motorcycle, or ATV gloves
- LED activity indicator
- Long 5 ft (1.5m) cable for accessing Zt-2 or Zt-3 Wideband controllers
- Plug and play installation, no wiring required; plugs directly into the Zt-2 or Zt-3 DATA port
- Supports 1 GB or 2 GB Micro SD cards
- Store 100s of hours of logs
- Auto-saved logs prevent data loss

The Zeitronix Black Box Data Logger is a flash memory data logger for use with Zeitronix Zt-2 or Zt-3 Wideband systems. The Black Box uses 1GB or 2GB Micro SD cards with power and data supplied by a Zt-2 or Zt-3 Wideband controller. The large button and indicator make it easy to start and stop logging. An auto-save feature maintains data in the event of power loss.
